

HP-ST12X3/210 is a polyvalent sealant tape recommended for high temperature cures up to 210 °C (autoclave cycles). It exhibits high tack and excellent adhesion. Economic and ideal to use on metal or composite tools, this sealant tape is easy to release from the tools: no contamination of the mould surface (it is recommended to remove the tape as soon as it has cooled down to room temperature).

Product identification

article number:	HP-ST12X3/210
name:	sealant tape

Technical characteristics

material:	Butyl rubber
colour:	yellow
thickness:	3 mm
width:	12 mm
max. use temperature:	210 °C ± 5%

Dimensions

length:	12,5 m
rolls/carton:	22 pcs.

Keep this product at room temperature and normal humidity (50-60 % φ). Do not freeze.
 Shelf life: Use within 12 months after delivery.
